The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,2,3,5,6,7,8,9,10,11,12,13,15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zilincar, III RE.36,669 in view of Ordoukhanian 5,282,368. Zilcar, III teaches the device claimed including elongated display member 24, support hangers 32 and bracket 38. Absent is the U-shaped bracket and thumb screw. Ordoukhanian teach a u-shaped bracket 22 and thumb screw 28. Note also pivotally adjustable bracket 36 also having thumb screw. To modify Zilincar III to include u-shaped bracket and thumb screw for ease of adjustment would have been obvious for one having ordinary skill in the art at the time of the invention.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Other adjustable racks are illustrated by Kasnowich 2,642,250; Whitaker 1,337,867; and Sims 417,102.

Applicant's remarks have been considered but are considered moot in view of the new grounds of rejection.
